KARNATAKA STATE BIOENERGY DEVELOPMENT BOARD (KSBDB)

Regional Institute of Cooperative Management (RICM) / Karnataka Evaluation Authority (KEA) evaluation of Lead NGO's performance, Recommendations and follow-up action :

Recommendations	Follow-up action
1. Depending upon the performance of the 32 lead NGOs", all the 21 lead NGOs" in the first category (satisfactory) could be retained. The first 4 in the second category (average) may be retained. The remaining 3 in the second category and all the 4 in the last category (unsatisfactory) are suggested to undergo refresher training (before their continuance at the discretion of KSBDB.	The Board has budgetary allocations for continuation of 12 NGO's service in 12 districts during 2017-18. In view of the KEA recommendations 12 NGOs' have been selected for the year 2017-18 and 2018-19. (NGO's has secured more than 75% marks on overall performance). The list of NGOs' and their ranking is given in Annexure -A.
2. While identifying the new lead NGOs', it is desirable not to identify those NGOs' which are entirely from other fields and not in any way can understand the nuances of the biofuel project.	The Board will implement the recommendations during the appointment of new NGOs' in course of time.
3. The lead NGOs' are to be made more accountable to the Board.	The NGOs' Administration, Finance and field coordination has been monitored by the board periodically and made them accountable.
4. The short comings of the lead NGOs' discussed in the study may be borne in mind and corrective measures be taken on the uses such as inadequate awareness programs; not working at the Grama Panchayat level; not forming biofuel farmer's groups; not motivating and equipping VFC, SHGs, Water User's Committees etc.improper execution of programs such as Suvarna Bhoomi, Hasiru Honnu & Baradu Bangara; non-attendance at the DMCs, non-submission of periodical reports, inadequate documentation of issues etc.	NGOs are not directly implementing these programmes, their role is facilitation, training and convergence with the implementing Line departments. However the suggestions and guidance is considered.
5. Involvement of rural community such as SHG, VFC, Water users group needs to be strengthened.	Self Help Groups (SHGs), Village Forest Committees (VFCs) and other organizations actively involved in the programmes.
6. The timely distribution of planting material is a key issue in plantation activity. Ensuring timely seedlings by	The Lead NGO's have played significant role in plantation activities and are coordinating with

the Forest Department is needed.	the District Biofuel Monitoring Committee and the coordinators of Biofuel Research, Information and Demonstration Centres (BRIDCs).
7. Monthly progress review at the district level is recommended for the development of biofuel programmes.	<p>Under the Chairmanship of CEO of ZP, District Biofuel Monitoring Committee is constituted to review the implementation of biofuel programmes in the district. The District committees are monitoring the activities of the NGO's and also the Coordinators of BRIDCs.</p> <p>The Board is conducting quarterly review meetings of NGO at State level and monitoring the progress.</p>
8. All the stakeholder departments at the district level are to be made accountable to the Board/RDPR/ZP.	<p>The government has constituted the District Biofuel Monitoring Committee including all the line departments like Forest, Agriculture, Horticulture, and Sericulture are the members of the committee. The committee will oversee the Biofuel activities in the District.</p> <p>The key points of evaluation along with recommendations have been sent to all CEO for guidance.</p>
9. As the lead NGOs' may not have sufficient clout to coordinate various stakeholder departments, periodical review at the State level would help smooth coordination amongst various stakeholder departments.	The board has taken initiative to review the progress periodically.
10. There is a need to design 'Training Module' for all NGOs' before implementing the programmes.	The training module developed and NGOs" are coordinating awareness and training programmes.
11. The Board may designate a person at the Zilla Panchayat to help execute various activities of the Board.	The IREP engineers of ZP is the Co-convenor of the District Biofuel Monitoring Committee. The IREP engineers are coordinating the biofuel activities in the district.

The list of LNGOs'' scored more than 75% in KEA evaluation and their services continued by the Board during 2017-18 and 2018-19 ;
