ಕರ್ನಾಟಕ ಸರ್ಕಾರದ ಸಚಿವಾಲಯ
ಬಹುಮಹಡಿ ಕಟ್ಟಡ
ಬೆಂಗಳೂರು, ದಿನಾಂಕ: 18.01.2019

ರವರಿಂದ,

ಸರ್ಕಾರದ ಅಪರ ಮುಖ್ಯ ಕಾರ್ಯದರ್ಶಿಗಳು
ಅರಣ್ಯ, ಪರಿಸರ ಮತ್ತು ಜೀವಶಾಸ್ತ್ರ ಇಲಾಖೆ
ಬಹುಮಹಡಿ ಕಟ್ಟಡ, ಬೆಂಗಳೂರು.

ರವರಿಗೆ,

ಮುಖ್ಯ ಮೌಲ್ಯಮಾಪನಾಧಿಕಾರಿ,
ಕರ್ನಾಟಕ ಮೌಲ್ಯಮಾಪನ ಪ್ರಾಧಿಕಾರ,
5ನೇ ಮಹಡಿ, 2ನೇ ಹಂತ, ಬಹುಮಹಡಿ ಕಟ್ಟಡ,
ಬೆಂಗಳೂರು.

ಮಾನ್ಯರೆ,

ವಿಷಯ: ಅರಣ್ಯ ಇಲಾಖೆಯ ಮೌಲ್ಯಮಾಪನ ಅಧ್ಯಯನ ವರದಿಗಳಿಗೆ
ಸಂಬಂಧಿಸಿದಂತೆ ಕೈಗೊಂಡಿರುವ ಕ್ರಮಗಳ ವರದಿಯ ಕುರಿತು
ಉಲ್ಲೇಖ: ತಮ್ಮ ಪತ್ರ ಸಂಖ್ಯೆ: ಕೆಇಎ 51 ಎಟಿಆರ್(ಮೌಅ) 2018, ದಿನಾಂಕ:
05.10.2018

ಮೇಲ್ಕಂಡ ವಿಷಯಕ್ಕೆ ಸಂಬಂಧಿಸಿದಂತೆ, ಉಲ್ಲೇಖಿತದಲ್ಲಿ ಕೋರಿರುವಂತೆ 2009-10 ರಿಂದ 2013-14ನೇ ಸಾಲಿನವರೆಗಿನ CAMPA, 13th Finance Commission, NAP-FDA, NBM, SCP and TSP ಆರು ಯೋಜನೆಗಳ ಬಗ್ಗೆ ಅರಣ್ಯ ಇಲಾಖೆಯ ಅನುಪಾಲನಾ ವರದಿ(Action Taken Report)ನ್ನು ಈ ಪತ್ರದೊಂದಿಗೆ ಲಗತ್ತಿಸಿ ಕಳುಹಿಸಿಕೊಡಲು ನಿರ್ದೇಶಿಸಲ್ಪಟ್ಟಿದ್ದೇನೆ.

II. Title of the Evaluation Study: Evaluation study of Forestry Program - Unit 4 - 2009 to 2013 - Report - CAMPA

Department: Forest Department. [ATR Date: 18-09-2017]

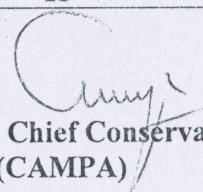

ECO: Hyderabad Karnataka Center for Advanced Learning (HKCAL).

Sl. No.	Recommendation of the Study	Action Taken by the Department	Status <i>Implemented/ Being Implemented/ Partially Implemented/ Not Implemented/ Policy Decisions/ General Recommendations.</i>	Remarks / Comments
1.	The activities under CAMPA are too many resulting in very thin spread of investment which may not have desirable impact on the departmental programs. It should focus much on the compensatory plantations by spending 70% investment and rest on the natural forests management.	Action taken report provided as per letter no. ಎ3/ಮುಅಸಂ/ಮೌಮಾ/ ಸಿಆರ್ - 01/2017-18 dated 18 th Sep 2017 by Forest Department includes reports by Deputy Conservator of Forests of the respective forest divisions.	Partially implemented	Compensatory plantations can be taken only in the area equal to the forest land diverted. Extent and Amount is fixed and cannot be raised to 70%.
2.	Expenditure on the building maintenance and vehicles should not be a major activity.		Implemented	Only a minor component of CAMPA funds is spent on vehicle repairs.
3.	The investment on the research and wildlife is inadequate needs to be balanced.		Being implemented	Allocation for Research & Wildlife has increased in the recent years.
4.	The natural forests, bio-diversity conservation, enrichment planting and research programs needs to be given priority.		Being implemented	
5.	Plantation size: Many compensatory plantations have been raised are very small in size (less than 5 ha). This may not be viable to maintain and protect. It is better to aggregate the smaller units into a viable size of at least 10 ha to raise plantations.		Implemented	Presently bigger blocks only are being taken up for Compensatory plantations.

6.	The plantation on degraded sites must be well defined as in many places well stocked areas have been planted up.		Implemented	
7.	The site clearance for raising plantation was noticed in some areas which need to be avoided.		Not practical recommendation	It depends on site conditions. Some clearance may be required if area is covered with weeds for bushes.
8.	Choice of species: The species choice was very mechanical and there was no effort to match the sites.		Unwarranted	Choice of species normally made as per the site conditions, local vegetation, survival and protection aspect.
9.	Acacia auriculiformis is planted as core species in many compensatory plantations in high rainfall areas which may be completely avoided. Native species mix is the best option.		Unwarranted	For non forest CA land, protection of land becomes a big priority. In some areas land may be required to cover with fast growing Acacia plantation in first cycle of planting. Later on, native species will be planted.
10.	The SMC works are done very unscientifically. A guideline may be necessary to design and structure the works by estimating the quantum of water that could be impounded is to be done. The contour maps are to be used to locate the structure. The planning processes to regulate the SMC works are necessary.		Partially implemented	
11.	The protection measures were not effective in many places. It is essential to provide maintenance provisions for five years so that the purpose is well achieved.		Policy decisions	

12.	Plantation care: The plantation care and maintenance needs to be done for minimum five years. The investment must be done to ensure success of the plantations.		Policy decisions	
13.	CAMPA must set a very successful model of plantation through innovations and higher investment as there is no cap on the unit cost.		Being implemented	
14.	Three year assessment is too early to judge the success. There should be five years interval evaluation twice to make a meaningful evaluation.		Policy decisions	
15.	Internal evaluation: The internal evaluation needs to be strengthened and the database must be established to monitor the changes.		Policy decisions	

Abstract

Study Name: Evaluation study of Forestry Program - Unit 4 - 2009 to 2013 - Report - CAMPA	
Status	To be filled up by the Department
Implemented	3
Partially Implemented	2
Not Implemented	0
Being Implemented	3
Policy Decisions	4
General / Unwarranted / Not Practicable Recommendations.	3
Total No. Of Recommendations	15
