Title of the Evaluation Study: Evaluation study of Forestry Works for the period 2009-13 - Report NBM Unit - I & III

Department: Forest Department. [ATR Date:18-09-2017]

ECO: Hyderabad Karnataka Center for Advanced Learning(HKCL).

| Sl. No. | Recommendation of the Study                                                                                                                     | Action Taken by the Department                                                                                                                                                                                             | Status<br>Implemented/ Being Implemented/ Partially Implemented/ Not Implemented/ Policy Decisions/ General Recommendations. | Remarks / Comments                                                           |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------|
| 1.      | Investment on creating bamboo plantation may not be advisable. Rather the tending and improving the existing stock may be a better thing to do. | Action taken report provided as per letter no. ಎ3/ಮುಅಸಂ/ಮೌಮಾ/ಸಿಆರ್ - 01/2017-18 dated 18 <sup>th</sup> Sep 2017 by Forest Department includes reports by Deputy Conservator of Forests of the respective forest divisions. | Implemented                                                                                                                  | Component of Improving the existing stock is being done.                     |
| 2.      | The investment on raising the plantations in drier district may be avoided as the results are not encouraging.                                  |                                                                                                                                                                                                                            | Implemented                                                                                                                  | Action is being taken to raise Bamboo plantations other then drier districts |
| 3.      | The site clearance for raising plantation was noticed in some areas which need to be avoided.                                                   |                                                                                                                                                                                                                            | Not Implemented                                                                                                              | This will be followed in future                                              |
| 4.      | Choice of species. The species choice was very mechanical and there was no effort to match the sites.                                           |                                                                                                                                                                                                                            | Implemented                                                                                                                  | In future this will be followed                                              |

|    |                                                                                                                                                                                                                                                                                                                 |  |                 |                                                                                            |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|-----------------|--------------------------------------------------------------------------------------------|
| 5. | Acacia auriculiformis is planted as core species in many compensatory plantations in high rainfall areas which may be completely avoided. Native species mix is the best option.                                                                                                                                |  | Not Implemented | Other than Bamboo no species are being grown                                               |
| 6. | The SMC works are done very unscientifically. A guideline may be necessary to design and structure the works by estimating the quantum of water that could be impounded is to be done. The contour maps are to be used to locate the structure. The planning processes to regulate the SMC works are necessary. |  | Not Implemented | No SMC works are being done while raising bamboo plantations                               |
| 7. | The protection measures were not effective in many places. It is essential to provide maintenance provisions for five years so that the purpose is well achieved.                                                                                                                                               |  | Implemented     | Maintenance of bamboo plantation is being done for 2 years after planting                  |
| 8. | Plantation care. The plantation care and maintenance needs to be done for minimum five years. The investment must be done to ensure success of the plantations.                                                                                                                                                 |  | Implemented     | Provision of only 2 years for protection has been made under raising of bamboo plantations |
| 9. | NBM must set a very successful model of plantation through innovations and higher investment as there is no cap on the unit cost.                                                                                                                                                                               |  | Implemented     | The existing raising of bamboo plantation model is found to be successful                  |

|     |                                                                                                                                                |  |                 |                                                                                                            |
|-----|------------------------------------------------------------------------------------------------------------------------------------------------|--|-----------------|------------------------------------------------------------------------------------------------------------|
| 10. | Three year assessment is too early to judge the success. There should be five years interval evaluation twice to make a meaningful evaluation. |  | Not Implemented | Evaluation will be done for every 5 years in future after obtaining approval from the competent authority. |
| 11. | Internal evaluation. The internal evaluation needs to be strengthened and the database must be established to monitor the changes.             |  | Implemented     | Internal evaluation is being done by the department                                                        |

### Abstract

| Study Name: Evaluation study of Forestry Works for the period 2009-13 - Report NBM Unit - I & III |                                                                                                                                                                                                                                    |
|---------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Status                                                                                            | To be filled up by the Department                                                                                                                                                                                                  |
| Implemented                                                                                       | 7                                                                                                                                                                                                                                  |
| Partially Implemented                                                                             | 4                                                                                                                                                                                                                                  |
| Not Implemented                                                                                   | -                                                                                                                                                                                                                                  |
| Being Implemented                                                                                 | -                                                                                                                                                                                                                                  |
