Title of the Evaluation Study: Evaluation study of Forestry Programme - Unit-2 - 2009 to 2013 Report NBM

Department: Forest Department. [ATR Date:18-09-2017]

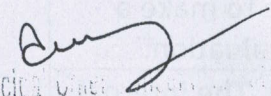

ECO: Hyderabad Karnataka Center for Advanced Learning(HKCL).

Sl. No.	Recommendation of the Study	Action Taken by the Department	Status Implemented/ Being Implemented/ Partially Implemented/ Not Implemented/ Policy Decisions/ General Recommendations.	Remarks / Comments
1.	Investment on creating bamboo plantation may not be advisable. Rather the tending and improving the existing stock may be a better thing to do.	Action taken report provided as per letter no. ಎ3/ಮುಅಸಂ/ಮೌಮಾ/ಸಿಆರ್ - 01/2017-18 dated 18 th Sep 2017 by Forest Department includes reports by Deputy Conservator of Forests of the respective forest divisions.	Implemented	Component of Improving the existing stock is being done.
2.	The investment on raising the plantations in drier district may be avoided as the results are not encouraging.		Implemented	Action is being taken to raise Bamboo plantations other then drier districts
3.	The site clearance for raising plantation was noticed in some areas which need to be avoided.		Not Implemented	This will be followed in future
4.	The protection measures were not effective in many places. It is essential to provide maintenance provisions for five years so that the purpose is well achieved.		Implemented	Maintenance of bamboo plantation is being done for 2 years after planting

5.	Plantation care. The plantation care and maintenance needs to be done for minimum five years. The investment must be done to ensure success of the plantations.		Implemented	Provision of only 2 years for protection has been made under raising of bamboo plantations
6.	NBM must set a very successful model of plantation through innovations and higher investment as there is no cap on the unit cost.		Implemented	The existing raising of bamboo plantation model is found to be successful
7.	Three year assessment is too early to judge the success. There should be five years interval evaluation twice to make a meaningful evaluation.		Not Implemented	Evaluation will be done for every 5 years in future after obtaining approval from the competent authority.
8.	Internal evaluation. The internal evaluation needs to be strengthened and the database must be established to monitor the changes.		Implemented	Internal evaluation is being done by the department
9.	NBM must explore involving the local community in raising and maintaining the plantations.		Not Implemented	In future involvement of local community in raising and maintaining the plantation will be done
10.	South American origin species tried by IWST is very promising and the same may be tried in addition to the Bheem variety.		Not Implemented	This will be considered after obtaining the concurrence from the GOI
