Compliance to suggestions and recommendations as listed in the NFSM Evaluation Report submitted by M/s Institute of Public Enterprise, Hyderabad to KEA:

Sl. No.	Recommendations/ Suggestions	Compliance	Status	Remarks/ Comments
(A)	Short Term Practicable Recommendations:			
1.	Inadequate availability of seeds of varieties of pulses released within 10 years for demonstrations and seed distribution components under National Food Security Mission (NFSM) leading to shortfall in achievements. Hence the age limit of varieties may be relaxed beyond 10 years for demonstration and seed distribution components under NFSM	GOI has accorded approval duly relaxing the age limit of seeds for distribution vide letter No. 2-13/2017-NFSM dated: 31.8.2017	Implemented.	GOI has accorded approval in the action plan for distribution of seeds under NFSM with due provision for distribution of recent varieties released within 10 years as well as promising/ruling varieties more than 10 years old also since 2017-18.
2.	It was reported that the subsidy given under NFSM is far below the incentive given under State Mechanisation scheme for farm equipments and water application tools. The subsidy for knapsack sprayer is Rs.3000/- under NFSM as compared to Rs. 7500/- under	Farm machineries are distributed in convergence with the other related schemes, thus ensuring negligible difference in subsidy.	Implemented.	The rate of assistance for farm equipments and water application tools is uniform across the CSS schemes as the GOI has accorded approval to follow guidelines of Sub Mission on Agriculture Mechanisation (SMAM) for distribution of farm equipments and that of Pradhan Manthri Krishi Sinchai

Sl. No.	Recommendations/Suggestions	Compliance	Status	Remarks/ Comments
	Farm Mechanisation scheme. Similar discrepancy found with water pipes and rotovators. The subsidy component of these inputs under NFSM may be enhanced on par with subsidies under State schemes for full utilisation of allocations.			Yajana (PMKSSY) for water application tools. Further, Farm machineries are distributed in convergence with the other related schemes, thus ensuring negligible difference in subsidy.
3.	Timely release of rate contract agreements to ensure timely availability of inputs.	To facilitate timely availability of inputs during the season, empanelment of suppliers for respective inputs is being done every year well in advance	Implemented	
4.	The beneficiary of one intervention may not be given another intervention benefit to reach the benefits of NFSM to large number of farmers.	As per the prescribed norms of NFSM Operational Guidelines, individual farmer will be given assistance for a maximum of 5 ha area for the target crop. However, action is being taken to reach more number of	Implemented	As per the Operational Guidelines of NFSM for the 12 th Plan Period, all the farmers are entitled to avail the assistance for various components of the Mission limited to 5 hectares in a season. However, by converging the schemes, are able to reach more beneficiaries.

Sl. No.	Recommendations/ Suggestions	Compliance	Status	Remarks/ Comments
5.	The study found that the conducting of 100 hectares extent of demonstrations in a contiguous blocks in a village is difficult in districts like Hassan and Udupi and this condition may be relaxed as per the local conditions	Cluster of 100 ha selected beneficiaries by duly converging the schemes.	Implemented	In the districts, the cluster size is decided depending on the crop type and availability of large, contiguous area under specific crop, thus ending up with fragmented clusters.
(B)	Short Term Practicable Recommendations:			
6.	While fixing the targets, it is suggested to consider the opinion of the field level implementing officers for need based components so as to be realistic about the attainability of targets; for example, diesel pumpsets and rotovators are in more demand in Belgaum district. In case of Udupi district, there was no demand for diesel pumpsets but heavy demand for electrical motors.	Action plan from districts will also be considered for allocation of programme to districts. However, benefits of similar nature will also be distributed under other CSS as well as State sector schemes.	Implemented	The equipments selected under the respective crop are as per the SM/AM guidelines.

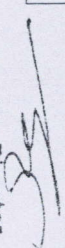

Sl. No.	Recommendations/ Suggestions	Compliance	Status	Remarks/ Comments
7.	Integrated Farming may be encouraged.	The scheme covers the production oriented components from sowing up to harvest with the aim of enhancing the crop productivity primarily. However, the concepts of intercropping, relay cropping, fallow cropping are also being promoted.	Implemented	The scheme is dovetailed with other flagship schemes of the department like Krishi Bhagya Yojane thus ensuring adoption of integrated farming approach.
8.	Agricultural Universities and Research Institutes have to play an important role in bringing out high yielding hybrids and varieties suitable to local conditions. Also make sure enough quantities of seeds are made available in association with State Seed Corporation.	Year 2016 being International Year of Pulses, programme of incentivising the farmer to take up certified seed production of pulses (of latest varieties). Further, seed hubs are also being established at KVK of SAUs.	Being Implemented	Provision has also been made for production of certified seeds of latest varieties of pulses and nutri cereals under NFSM. Karnataka State Seed Corporation is the Nodal institute to take up certified seed production in association with SAUs.
(C) Policy Recommendations:				
9.	Districtwise requirement based programmes to be developed	Action plan from districts will be considered for	Implemented	State Action Plan is prepared duly considering the district action plans.

Sl. No.	Recommendations/ Suggestions	Compliance	Status	Remarks/ Comments
10.	Use of appropriate technology for better monitoring of the project	allocation of programme to districts.	Implemented	Web and mobile based applications have been developed to monitor the implementation of demonstrations and geo tagging of the demonstrations.
11.	Concurrent monitoring & evaluation in future.	At present, impact of the evaluation of the programme by GOI is under progress.	Being Implemented	It has been proposed to take up evaluation of NFSSM scheme for the remaining years of the 12 th Plan Period i.e., from 2014-15 to 2016-17 and extended period of 2017-18 to 2018-19.

Abstract

Study Name: Evaluation of National Food Security Mission Scheme in Karnataka

Status	To be filled by the Department
Implemented	7
Partially Implemented	0
Not Implemented	0
Being Implemented	1
Policy Decision	3
Total Number of Recommendations	11
