**ACTION TAKEN REPORT ON THE EVALUATION OF SUVARNA GRAMODAYA SCHEME**

Recommendations	Action Taken Report (Incorporation in Grama Vikasa Scheme)
<b>SHORT TERM PRACTICABLE</b>	
<p>It is observed that, all the villages are not provided with all eight components envisaged under the Scheme. This may be due to insufficient funds allocated for such selected villages.</p> <p><i>It can be noted that, normally, Rs.100/- Lakhs is allocated / village under the Scheme. It is recommended that the villages covered under the Scheme shall be released at least the allocated funds fully in order to see some changes in such villages.</i></p>	<ul style="list-style-type: none"> <li>• Recommendations are considered and Gram Vikas Yojana is being implemented at a total estimate of Rs.750.00 crores in 1000 villages within the limits of 189 Rural Assembly Constituencies of the State.</li> <li>• Based on the population of 2011, grants at the rate of Rs.7,500/- per head and maximum amount of Rs.3.75 crores to each Rural Assembly Constituency(for maximum 5 villages) is being allotted.</li> <li>• Similarly maximum amount of Rs.6.00 crores to 6 rural Legislative Assembly constituencies having 2 complete talukas (maximum 8 villages) is being allotted.</li> <li>• Grants are being released on quarterly basis based on the performance of developmental works in the selected villages.</li> </ul>
<p>While preparing proposals, the requirements of the villages to be assessed properly.</p> <p><i>It is recommended that based on the discussions with village community, Grama Panchayats and local leaders infrastructure requirements of the villages to be assessed, finalized and forwarded to the department for the final approval. This will enable comprehensive development of the village through participatory approach.</i></p>	<ul style="list-style-type: none"> <li>• Suggestions are considered and percentage wise amount earmarked for different developmental programmes in the scheme are clearly mentioned in the Grama Vikasa Guidelines (Page No.24 -27).</li> <li>• However Ward Sabha and Grama Sabha of selected Villages would approve the Action Plan of concerned villages.</li> <li>• Scheme Monitoring Committee under the Chairmanship of concerned Hon'ble MLA would observe the developmental works in the selected villages (Grama Vikasa Guidelines, Page No. 21) and powers are given to the committee for change of works (within the guidelines limit) based on the local requirements</li> </ul>
<p>If road only is implemented without drainage system, the quality of road would not last long as there would be again water logging problems because of no drainage facilities.</p>	<ul style="list-style-type: none"> <li>• Suggestions are considered. Under Grama Vikasa Scheme priority has been given for physical infrastructure like Roads</li> </ul>

05-02-15  
 11:17  
 11:17

<p><i>It is recommended that there is need for coverage of drains as part of road construction enabling smooth flow of storm water and to increase the life of the roads and drains. Similarly, it is recommended that, other components such as Samudhaya Bhavan, Anganwadi need to be developed with required facilities to render them 100% useful to the village community.</i></p>	<p>and Drains as required &amp; decided by selected Grama Panchayats. Major Share of 50% grant allocated is earmarked for the purpose. (Grama VikasaGuidelines,Page No.24 – 25)</p>
<p>Components like IEC &amp; Training and Solid Waste Management were not given due weightage during implementation of the Scheme. As these components are also very important,</p> <p><i>it is recommended to give due importance to them for coverage under the scheme.</i></p>	<ul style="list-style-type: none"> <li>• Importance has been given for Solid Waste Management in the scheme. Construction of SWM units which will treat the dung/dung hill in scientific and hi-tech manner (as existing in Hitnal of Koppal district and Kanakina Koppa of Gadag district) in selected villages is a compulsory part of different developmental works identified in the scheme and 10% of the grants are clearly earmarked for the purpose. (Grama VikasaGuidelines,Page No.24 – 25)</li> </ul>
<p>There is instances viz., though the buildings (Samudaya Bhavan and Anganawadi Buildings) are completed but not being handed over to village authorities and hence currently are not put to use.</p> <p><i>It is recommended that, initiations to be made for handing over the same to Grama Panchayat immediately after completion of construction for public use.</i></p> <p><i>A circular from Head Office may be issued to the implementing agencies / authorities accordingly.</i></p>	<ul style="list-style-type: none"> <li>• Suggestions are considered. Delay in land acquisition due to legal matters has delayed the construction of Anganawadi / Samudaya Bhavan in some villages.</li> <li>• However, as recommended, letters have been addressed to all CEOs of the ZPs to expedite the matter.</li> </ul>
<p><b>LONG TERM PRACTICABLE</b></p>	
<p>It was observed during field study that, some of the villages are provided with more than one Samudaya Bhavanas for fulfilling needs of different communities. The purpose of socializing within the village community is not served and it only divides village on basis of casts.</p> <p><i>It is recommended that, even more than one Samudaya Bhavan is provided for a village, such facilities to be allowed for usage by all caste and Communities avoiding discrimination.</i></p>	<ul style="list-style-type: none"> <li>• Recommendations are considered and a total of 12% of the grants are earmarked for the purpose construction of Samudaya Bhavans / Cultural Centers in the selected villages, and to be identified in the names of local dignitaries.</li> <li>• Such facilities will be allowed for usage by all caste and communities avoiding discrimination.</li> </ul>

<p><i>It is recommended that there is need for coverage of drains as part of road construction enabling smooth flow of storm water and to increase the life of the roads and drains. Similarly, it is recommended that, other components such as Samudhaya Bhavan, Anganwadi need to be developed with required facilities to render them 100% useful to the village community.</i></p>	<p>and Drains as required &amp; decided by selected Grama Panchayats. Major Share of 50% grant allocated is earmarked for the purpose. (Grama VikasaGuidelines,Page No.24 – 25)</p>
<p>Components like IEC &amp; Training and Solid Waste Management were not given due weightage during implementation of the Scheme. As these components are also very important,</p> <p><i>it is recommended to give due importance to them for coverage under the scheme.</i></p>	<ul style="list-style-type: none"> <li>• Importance has been given for Solid Waste Management in the scheme. Delay in land acquisition due to legal matters has delayed the construction of Anganawadi / Samudaya Bhavan in some villages.</li> <li>• However, as recommended, letters have been addressed to all CEOs of the ZPs to expedite the matter.</li> </ul>
<p><b>LONG TERM PRACTICABLE</b></p>	
<p>It was observed during field study that, some of the villages are provided with more than one Samudaya Bhavanas for fulfilling needs of different communities. The purpose of socializing within the village community is not served and it only divides village on basis of casts.</p> <p><i>It is recommended that, even more than one Samudaya Bhavan is provided for a village, such facilities to be allowed for usage by all caste and Communities avoiding discrimination.</i></p>	<ul style="list-style-type: none"> <li>• Recommendations are considered and a total of 12% of the grants are earmarked for the purpose construction of Samudaya Bhavans / Cultural Centers in the selected villages, and to be identified in the names of local dignitaries.</li> <li>• Such facilities will be allowed for usage by all caste and communities avoiding discrimination.</li> </ul>

**RECOMMENDATIONS REQUIRING CHANGE IN POLICY**

*It is recommended that, if required, a Third Party Inspections for certification of project implementation need to be emphasized. This will enable proper monitoring and utilization of allocated funds for a particular component ensuring judicious utilization of the funds as per the estimated quantities. This will further enable ascertaining quality and quantity as stipulated for the project.*

Suggestions are considered. A Third Party inspections are conducted as when necessary apart from activities of Supervision and Monitoring mentioned in the Guidelines (Grama Vikasa Guidelines, Page No.34)

*Due to overlapping of other schemes of the Government, there are instances of construction of Samudhaya Bhavan or Angawadis in the villages. In such cases, it is recommended that, not to make provision for such components under SGS to avoid repetition. This will enable judicious utilization of funds for some other villages which are deprived of such facilities.*

There are instances of construction of two or more Samudaya Bhavan in a particular village based on the strong demand by the local villages. However Recommendations are considered under Grama Vikasa Scheme and a total of 12% of the grants are earmarked for the purpose construction of at least one Samudaya Bhavans / Cultural Centers in the selected villages, and to be identified in the names of local dignitaries. Such facilities will be allowed for usage by all caste and communities avoiding discrimination.

*There are instances of construction of two or more Samudaya Bhavan in a particular village based on castes. It is recommended that, a decision may be taken to make a provision for one Samudaya Bhavan per village and such facilities to be allowed for usage by all caste and Communities avoiding discrimination. Further, such decisions would enable Government to utilize funds judiciously for completion of other components in the SGS villages.*

*The Suvarna Gramodaya Scheme is a special development programme of Government taken up for improving the village life on par with urban look. To get such urban look in these villages, in addition to the existing components there is need for inclusion of urban facilities such as rural market hubs / shady areas, common service centre, warehousing facilities for storage of agri products, rural economy based projects, village linked tourism, development of linking roads to the social infrastructure viz., hospitals, educational centres, entertainment centers which are available in the nearby urban centres. The provision for such facilities would enable improvements in socio economic development of the villages, thereby meeting the overall objective of the SGS scheme.*

Recommendations are considered and based on the availability of the funds, provisions will be made for the improvement of Socio Economic Development of the villages.

<p>To increase the success rate under training component, there is need for imparting training based on demand in local job market. There is also need for organizing follow-up meetings periodically to keep track of exact progress achieved under the component.</p> <p><b><i>It is recommended that, a necessary instruction may be issued from the Head Office to such empanelled / Selected training Institutes to conduct training programme accordingly.</i></b></p>	<p>Recommendations are considered for future programme.</p>
<p>Solid Waste Management is not given due importance as expected. It was observed during field study that, the facilities provided have not been accepted fully by the village community. Generally, there was mismatch between what is provided and what is required. In certain villages, it was observed that, even though trolleys, baskets are provided, however the same have been not utilized due to lack of manpower. In such cases, it was opined that, alternatively provisions may be made for manure pits for dumping solid waste on their own.</p> <p><b><i>It is recommended that, at the planning level the requirements of the villagers under SWM may be discussed and same may be considered and provisions for such facilities shall be included in the forth coming programmes.</i></b></p>	<p>Suggestions are considered and in the Guidelines of the Scheme, it is clearly mentioned regarding construction of SWM units which will treat the dung/dung hill in scientific and hi-tech manner (as existing in Hitnal of Koppal district and Kanakina Koppa of Gadag district) in selected villages and 10% of the grants are clearly earmarked for the purpose. (Grama VikasaGuidelines,Page No.24 – 25)</p>
<p>On analysis of component-wise data provided by respective ZPs, it was observed that, there is mismatch between permissible fund allocations when compared to funds utilisation at field level.</p> <p><b><i>It is recommended that, mid course evaluation or concurrent evaluation by the Department may be initiated to monitor the project in terms of physical and financials as per guidelines.</i></b></p> <p><b><i>A uniform format may be evolved for reporting the progress of the components (indicating both physical and financial targets and accordingly the progress achieved) by local level implementing agencies to RDPR department on a periodical basis. This will help to establish a quick and systematic monitoring mechanism at Head Office level.</i></b></p>	<p>Periodically Concurrent Audit of Suvarna Gramodaya Scheme on quarterly basis have been taken up by the concern Zilla Panchayats. (copies are enclosed)</p>
