Suggestions of Evaluator and Action taken by the Tourism Department:-

Sl. No.	Observations/Suggestions made by Evaluator	Action taken
A	Chitradurga (Tourist Facilities)	
1	Going by the number of visitors, there is need to increase the number of beds in the centre.	It is not possible due to non availability of site and restrictions of Archeological Survey of India.
2	Starting of the restaurant is highly essential to facilitate visitors.	It has been opened for the public.
3	It may also be necessary to provide recreation facilities to the visitors in order to attract more tourists.	Not necessary.
4	Overall working of the centre is rated as good but publicity needs to be intensified to create awareness among the tourists. Since Chitradurga has a number of places of historical importance, any additional facility provided here would benefit the tourists who frequent this district.	Publicity is being carried out through website and printing materials.
B	Sadhanakeri, Dharwad (Tourist Facilities)	
1	Additional facilities required and suggestions are (1) a taralaya (2) pisciculture (3) additional irrigation facilities through sprinkler (4) Border planting with shelter belts with wind break species (5)	Not required as per the recommendations of D.C
2	At the entry point, there is drainage problem (sewage line flowing into the tank in rainy season). This needs to be addressed by constructing a diversion drain for sewage water immediately.	The drainage water entering the lake has been diverted and also erected Sewage Treatment Plant.
3	There is shortage of drinking water for the visitors within the centre.	Drinking water problem has been solved.
C	Mekeadaatu (Tourist Facilities)	
1	A vehicle entry fee of Rs. 50/- for buses and Rs. 20/- for cars is being collected from the owners who park their vehicles near the river (at Sangama). No parking arrangement nor any shade is erected. The entire area is full of garbage and left overs and plastic package materials. Overall picture of this centre is very disappointing in spite of being an important tourist centre and frequented by both local and other visitors.	It comes under Grampanchayat control not possible to attend.
2	At the Meke daatu valley point (which is the final point for the visitors) no arrangements are available for sitting nor is there any shade to protect the tourists from sun or rain. The following improvements are felt necessary:	Action will be taken to provide the facilities after inspection.

Sl. No.	Observations/Suggestions made by Evaluator	Action taken
3	Parking lot for the vehicles at the entrance or in some strategic approachable place	Action will be taken to provide the facilities after inspection.
4	Lighting, roads, gates	It is not possible due to security problem and maintenance
5	Sitting/shade facilities at the Meke daatu point,	We will take up this work in next action plan 2013-14
6	Protection fence/arrangement at the Meke daatu last point.	We will take up this work in next action plan 2013-14
7	There is no resting roof at the Meke daatu point. Presently there is only one circular umbrella type roof with elevated platform which is being used by vendors. Visitors are forced to spend time observing in hot sun, or rain during the rainy season. There is need to provide a suitable shelter space to accommodate between 200-300 visitors.	We have constructed a hotel, shopping complex, parking place which is run by KSTDC for the public.
8	The Road connecting Sangam from Kanakapura is poor and needs to be improved since an average of 200-300 vehicles pass through the stretch.	This area is comes under Forest department they not allow to do any activities.
9	Presently, people use their own mode of transport since there is no state transport facility. There is urgent need to provide bus service between Bangalore and Meke daatu (from Kempegowda bus station and K.R. Market), especially during holidays.	We have informed KSR TC to put more buses and KSTDC is conducting tourist package to Meke daatu.
D	Nrupathunga Hills, Hubli Tourist Facilities	
	In view of increase in number of visitors and their expectations, there is need to provide additional facilities such as:	
1	Creation of water body in the foot hill region (behind Sri Sai Baba Temple)	We have developed so many tourist facilities out of Rs. 174.90 lakhs The created facilities are Park, Construction of Canteen block ,Toilet, Overhead water tank, Gazebo ,borewill , fencing works all around ,parking facilities electrification and plantation is also takes place of hill.
2	Yatri Nivas	Not required.
3	Stalls	Not required.
4	Ropeways	Not required.
5	Dhyan Mandir for those who like to meditate	Not required.
6	Border planting (in association with Forest Department)	Garden and plantation work is being executed.
7	Vermi compost unit	Not necessary.

28

Sl. No.	Observations/Suggestions made by Evaluator	Action taken
8	Other facilities such as deer park, snake park, aquarium etc.,	Maintenance is a problem
9	Sprinkler system	Not required.
10	Solar lamps	Security and Maintenance is a problem
11	Additional irrigation facilities to maintain lawn and sustainability of greenery created so far.	Erection of Borewell is made for garden to create greenery
12	It is also suggested that the entire area should be declared as "No Plastic zone" in view of influx of large number of visitors frequenting the centre. Hawkers and traders presently use plastic bags/ carry bags for various sales / parcel purposes. Such plastic material is often dumped randomly creating environmental hazards.	We have informed the local administration
E	Shanti Sagar (Sulekere), Davangere district (Yathri Nivas)	
1	The works for creation have already been completed but are yet to be handed over for facilitating the use by the visitors. A study of the structures completed brought out the following:	Action is being taken to open for the public through KSTD
2	Staircase window glass panel are broken/ frame is disturbed.	Action is being taken
3	Store room window glass and terrace door not fitted	Action is being taken
4	Fittings like geyser etc., and solar connection not provided	Action will be taken
5	Since the facilities are yet to be used, the nearby villagers are not in a position to assess the benefits to them. However, many young entrepreneurs indicated that they would have opportunities to set up one or other enterprise for their livelihood purpose. In view of its natural panoramic view, it is going to serve as a very good tourist centre, in future.	Action not required
6	The Department of Tourism may suggest Forest Department to plan and take up afforestation programme in the hill range bounded by the reservoir, which would increase the greenery in the surroundings.	We have informed the forest department to take action.
F	Varoor (Hubli taluk) Yatri Nivas,	

Sl. No.	Observations/Suggestions made by Evaluator	Action taken
1	Construction work is nearing completion requiring quality finishing.	The construction work is completed. Action is being taken to handover property to Jain trust.
2	Canteen facilities need to be started immediately in order to provide food and beverages to the visiting pilgrims since there are no eateries nearby the vicinity.	The trust has to take action to start the canteen and all facilities to the public
3	There also is a need to request the Transport Department (KSRTC) to give an official bus stop with shelter. Presently, buses do not stop at this point and much depends on the conductor and driver's mood and attitude and official bus stop would certainly help the pilgrims. Use of private mode of transport would be expensive and middle class/ordinary pilgrims may not be able to afford to use the same.	The trust has to take action to start the canteen and all facilities to the public
4	The Temple Trust also runs an ITI / Polytechnic nearby, and large number of students attend the classes. At times, they need accommodation and food which if provided, would help them and save them of the time and money spent on their travel to the nearest eatery or lodge.	It depends upon the decision of trust.
5	Publicity and propaganda might be necessary	Action has to be taken by the trust
6	Landscaping of garden would add to aesthetic value of the area	Creation of Park and other facilities is being with an amount Rs.100.00 lakhs.
G	Yatri Nivas, Kuravatti	
5	Since the centre is in the vicinity of the temple which is a famous local pilgrim centre, there would be regular flow of tourists and pilgrims to the temple. It would definitely also create local employment opportunities.	A Dormitory Dinning hall, Kitchen and VIP rooms have constructed for the tourist of Ujjani Math and handed over this property to the Ujjani Mathia.
H	Shikaripura (Dormitories)	
1	This centre is strategically located and can attract large number of visitors when thrown open to public. Since it is yet to be opened, interviews with tourists could not be carried out. However, informal interactions with some of the residents of the area indicated that they are waiting for the centre to open and opined that the facility will be attractive and useful to the locals as well as tourists. However, some part of civil works (stadium, electrical works) was under progress.	This facility has been opened to the public and handed over the maintenance to the PWD and Cauvery Water Corporation to take care of the property.

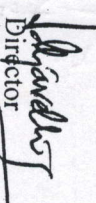

382

Sl. No.	Observations/Suggestions made by Evaluator	Action taken
2	Even though the centre is officially inaugurated, it is yet to be made available to the locals. Delay in completion of some works particularly in the park area need to be addressed to immediately. Otherwise, this centre has high potential of tourist utility and quality of civil works is to the specifications.	Action is being taken.
1	1 Uduthadi (Dormitories) The centre would be able to provide some good facilities to the visitors when handed over to the Trust.	This facility has been opened to the public and handed over the maintenance to the Akkamahadevi trust to take care of the property.
2	Completion of the remaining works relating to electricity and water supply is necessary to use the same.	An amount of Rs.200 per month is being fixed as rent to the Trust by the Department.
3	It is not known whether the fees/rentals collected / to be collected would be shared between the Trust and Tourism Department. Clear indications were not available.	An amount of Rs.200 per month is being fixed as rent to the Trust by the Department.
J (Eco-tourism)	Hanumanthanagar (Nisarga Dhama), Mandya	
1	In view of heavy influx of visitors on holidays and festivals, additional toilet block is necessary. In addition, the existing two units need to be maintained in hygienic conditions. Some repairs to existing units also is necessary	We have informed to the Secretary Bharati Education Trust Hanumanthanagar Maddur Taluk Mandya District to take needful action since this project has been handed over to them for maintenance.
2	Since procurement of deer appears to be difficult as at present, it may be prudent to convert this into an Aviary stocking with domesticated fowls, and poultry such as geese, turkeys, guinea fowl, etc. Alternatively, rabbit rearing could also be an alternative.	Not necessary.
3	There is need to adopt water recycling/ circulation system in the fish pond to maintain cleanliness of the same and avoid heavy mortality of fish	We have informed to the Secretary Bharati Education Trust Hanumanthanagar Maddur Taluk Mandya District to take needful action since this project has been handed over to them for maintenance.
4	To meet the additional demand from the visitors on festival days, it is desirable to add some more cottages on a detailed estimate of actual number of such cottages that could be maintained judiciously and with justification of their viability.	Not necessary.
5	It is advantageous to go for border planting along the entrance of the park to enhance the aesthetics of the same	Not necessary.

Sl. No.	Observations/Suggestions made by Evaluator	Action taken
6	Declaring the eco park as plastic free zone is necessary and the trust should initiate steps in this direction	Action has to be taken by the trust
7	Since there are no sign boards between the main road and the centre, pilgrims and visitors find it difficult to locate and reach with ease. If adequate number of sign / direction boards are installed to provide proper direction to the visitors right from the deviation point on Mysore road, it would be highly useful to the tourists.	We have informed to the Secretary Bharati Education Trust Hanumanthnagar Maddur Taluk Mandya District to take needful action since this project has been handed over to them for maintenance.
K	Kamalapura (Hampi) (Eco-tourism)	
1	Construction of a good conference room	
2	Construction of an Office Room	These facilities has been provided by the the Managing Director Jungle Lodges & Resorts Ltd. Bangalore.
3	Construction of an Cloak Room	
L	Badami (LINK ROADS)	
1	The road is not well maintained and the kerb stone along the road not finished.	Action has to be taken by local authorities we have informed them to take necessary action.
2	The roadside concrete drains are filled with debris (plastic, sand, stone etc..) and needs regular maintenance.	
M	Hotel Mayura, Madikeri (Upgradation of Hotels)	
1	Leasing out of hotel on long term basis – the lease amount charged should take into account the total sunk cost and other recurrent costs including cost of monitoring	We have informed to the Managing Director Karnataka State Tourism development Corporation to take needful action since this project has been handed over to them for maintenance.
2	Conference halls are presently being used only occasionally. Though some revenue is being generated, there is scope to augment the same through publicity and propaganda. With a number of institutions/ agencies located around Madikeri and other districts like Mangalore, Chickmagalur, Mysore; some publicity programme could boost use of the facilities created.	
N	Malpe, near Udupi (Improvement of Beach resort)	
1	Facilities created are presently being used by tourists but additional facilities might be required. Better facilities could boost image of this resort and attract more and more tourists from other countries and help earn foreign exchange	The action has been taken to release Rs.25.00 lakhs for additional facilities creation by the department.

183

Sl. No.	Observations/Suggestions made by Evaluator	Action taken
2	Random interactions with local and foreign tourists indicated that they love this place because of its serenity and calm & quiet environment away from crowded cities, but yet, closer to mainstream.	No action.
3	Among the visitors, majority are highly qualified and belong to upper echelons of the society. As such, their expectations are high and there is a tendency of comparing with other beaches within and outside the country. In the light of this, further enhancement of facilities might go a long way in boosting the image of this resort, particularly.	Not necessary.
4	Improve cleanliness of the beach	It comes under local authority.
5	Ban littering of plastic and other material	It comes under local authority.
6	Provide more utilities and services like shops, etc.,	It comes under local authority.
0	Sakkarebail (Shimoga) Jungle camps & trails	
1	Since the project works have been completed and accommodation and other facilities are lying idle, it is desirable that the same is thrown open to the public as soon as possible.	The facilities have been opened to tourist.
2	This camp is on the main road but there is no official bus stop at the spot. Only request stops are provided by the KSRTC. It is desirable that official stoppage facility is provided nearby.	The KSRTC have requested to give stoppage.
3	Since the facilities are ready, it is suggested that some publicity could be given among the student communities / youth in and around the town and other places (preferably by distribution of hand outs and use of other media, direct sales promotion through contacts with the school managements / institutions). Since this is an educative venture, unless awareness is created, it might go unnoticed.	Publicity is being carried out through website and printing materials.

 Director
 Department of Tourism.
